SECRET

**Ritz Now Avenged—Captain Sigbee Paid a Visit to the Acting Captain General and was Honored**

ally Received—General Blanco at  
Manzanillo—Wrote red Condition  
of the Re concentrados at Re-  
medio.

Havara, Jan. 27.—At noon today Lieutenant Colonel Benedicto, with the Spanish Reina, battalion, surprised near Tapaste, this province, the camp of the insurgent Brigadier General Nestor Aranguren, killing Aranguren and four privates, wounding

The body of Brigadier General Aranguren was brought by train to Havana this afternoon and delivered to the military authorities. After identification it was sent to the morgue.

Brigadier General Aranguren was evi-

about 23 years of age, of fair complexion, with blonde hair and a small moustache. The body, which shows two bullet wounds one in the head and the other in the right leg, is dressed in cashmere pantaloons, gray woolen coat, yellow shoes and gaiters, comparatively new. It is said that the gaiters and the vest once belonged to Lieutenant Colonel Ruiz.

the aide de camp of General Blanco, who having gone to Aranguren's camp with terms of surrender, was executed by Aranguren, or with his approval.

According to the Spanish authorities, Brigadier General Aranguren was surprised while on a visit to a young woman on the Pita farm between Campos Florido and Tapatzen. He was wounded

and in trying to escape was shot dead.  
Among the prisoners is the father of  
the young woman. He was a member  
of Aranguren's band.

**A MILLION FOR POWDER.**

---

Expenditures Made November 1917

Washington, Jan. 2.—It is regarded as settled that the naval appropriation bill now being framed by a house sub-committee will contain three important items, namely: \$1,000,000 for smokeless powder, \$500,000 for reserve ammunition and \$92,000 for the establishment of a government

powder factory. The matter of having an ample supply of powder in order to meet the requirements of our naval vessels in an emergency has received careful consideration from members of the committee. As long as the old style of black powder was in use, the many private companies making this article gave assurance that a supply could be secured

On short notice. Now, however, with the general adoption of smokeless powder, the opportunities for speedy supply are said to be much reduced. For that reason it is proposed to allow \$1,000,000 for the purchase of this article; and at the same time provide a government factory which will thereafter produce an ample supply. The item of \$500,000 for reser-

ammunition will cover all classes of naval material, large and small, to meet the requirements of vessels nearing completion and of such emergencies as may arise.

---

**STILL IN DOUBT.**

**Hawaiian Treaty May Fail of Ratification.**

Chicago, Jan. 23.—A special to the Tribune from Washington says:

Fifty-seven votes is said to be the high-water mark of the Hawaiian strength in the senate. The opponents of annexation say the treaty will receive only between 43

and 33 votes. If Senator Morrill adheres to his intention, the voting strength will be 88, of which two-thirds would be 53 votes, or one less than the number required if he voted. The vote today on annexation admittedly would be adverse, but as the Republicans have lined up their strength, it is expected that Gorman and Teller will solidify the wavering Demo-

crats and Silver Republicans. On these two senators the fate of the treaty is said to rest. It is the opinion in the senate on both sides that Hawaii is gaining rather than losing by the delay in coming to a vote.

---

**Dispatches from Captain Ray.**  
Sailed for Honolulu, 22nd.

Seattle, Jan. 30.—The steamer Rosalia arrived tonight from Alaska. Among her passengers are E. H. Wells, who left Dawson City December 20. Wells claims to be the bearer of important dispatches from Captain Ray at Fort Yukon to the war department. He would give no hint of their contents.

Wells also states that Major Walsh has

issued an order prohibiting persons from entering the Yukon country with less than 1000 pounds of supplies exclusive of tea and coffee. The order was to be effective from January 15.

**Case Against Nansen.**  
New York, Jan. 27.—On the application of both sides of the suit brought by Geo.

H. Hathaway and Richard Heard against Fridtjof Nansen, the Arctic explorer, to receive \$20.00 damages for breach of contract in failing to complete the 50 lectures which it was alleged Nansen had agreed to deliver, the case was discontinued today. Heard and Hathaway were Nansen's managers during his re-

**Gold Reserve Burdensome.**  
Washington, Jan. 27.—The gold reserve today reached \$33,750,000, the highest point in about seven years. The accumulation is becoming something of a burden and the government is no longer encouraging its deposit.

**Getting Ahead of the Law.**  
New York, Jun. 27.—In anticipation of the new immigration law going into effect, the rush of immigration to this country has started. The Tartar Prince arrived today with 730 persons in the steerage. The vessel comes from Italian ports.

**Sailed for Juneau.**  
Tacoma, Wash., Jan. 27.—Loaded to the  
guards with 240 passengers and 800 tons  
of freight, the steamer City of Topeka  
sailed from Tacoma tonight for Juneau  
and way ports.

**Favorably Reported.**  
Washington, Jan. 24.—The senate committee on judiciary has reported favorably the nomination of Governor Griggs of New Jersey to be attorney general.

**Gus Walton.**  
New York, Jan. 23.—"Gus" Walton, a famous all-round athlete, and

 MINING COMPANIES THEN AND NOW.

To the man who keeps himself at all posted and regularly informed as to the number of mining companies which spring into lively physical existence like the mushroom over night, the way these organizations have lately died out and been blown to the four winds, recalls to him the fleeting life of the vegetable simile.  
 Two years ago mining companies in this state were born by the dozens every 21 hours. Two weeks ago an epidemic caused by a disorder known as assessment, wiped out existence hundreds of the most promising (if names count for anything) corporations.  
 It is not to be deplored, if the properties falling into the hands of the new owners are prospected and worked. It is a trifle rough on the innocents who put their money into what they considered a fairly good gamble, to be confronted now with simply pink printed or heavily encumbered certificates, as the remainder and sole reminder of their mining ventures.  
 Experience is valuable, despite the fact it comes late. This applies to the man with a pocket full of stock and also to the unprincipled promoter and schemer who sells the valuable lessons. His time will come surely. One benefit will certainly be derived from the wholesale slaughter of ownership in mineral land in Cripple Creek. The legitimate jumping of so many claims at the end of the year, in many cases was well planned. Large districts were secured, which eventually will be consolidated into one company instead of several dozen and with decent and honest arrangements that the buyer of stock will have some fair treatment. New outlying districts of the camp may prove of immense value with development work. But the people here have had a few hard knocks. A company embracing a territory miles in area, must have the proper management to suit the investor, otherwise money will not be forthcoming.

PRESIDENT MCKINLEY'S SPEECH.

So far as President McKinley's declarations regarding the tariff are concerned, he has not said any Republican to disagree with him. There is no doubt that prosperity has returned to this country, and is returning an increased measure, and Republicans are agreed that the connection of this with the return of the Republican party to power and the passage of the Dingley bill is something more than a coincidence. But it would be idle to claim that there is the same amount of agreement between the members of his party in regard to the financial intricacies of the president, and it is these which form the most significant parts of the speech delivered in New York on Wednesday evening.  
 The basis of the president's remarks is to be found in the financial plank of the St. Louis platform which is accepted by all Republicans as the principle of the party and which is as follows:  
 "The Republican party is unreservedly for sound money. It caused the enactment of the law providing for the resumption of specie payments in 1875, since then every dollar has been as good as gold. We are unalterably opposed to every measure calculated to debase our currency or impair the credit of our country. We are therefore opposed to the free coinage of silver except by international agreement with the leading commercial nations of the world, and until such an agreement can be obtained the existing gold standard must be preserved. All our silver and paper currency must be maintained at parity with gold and we favor all measures designed to maintain inviolably the obligations of the United States and all our money, whether coin or paper, at the present standard, the standard of the most enlightened nations of the world."  
 Upon this foundation the president erects a superstructure whose plan is outlined in the sentence: "Under existing conditions our citizens cannot be excused if they do not redouble their efforts to secure such financial legislation as will place their honorable intentions beyond dispute." But it seems that the president himself is laboring under the same difficulties as the Republican party; that is to say, he does not seem to be able to make up his mind as to any exact plan of financial reform that is efficient and practicable. Neither in his speech nor in the annual message did he commit himself to any definite measure. Neither the plan of the secretary of the treasury nor that suggested by the Indianapolis convention has yet received the approval of the chief executive. The Republican party stands very squarely upon the St. Louis platform and there is no doubt in the mind of anyone that so long as the party remains in power it will be "unalterably opposed to every measure calculated to debase our currency or impair the credit of our country," and that all our silver and paper currency will be maintained at a parity with gold. Beyond this the Republican party is not pledged by its platform; beyond this it is not possible to go in the face of the differences of opinion in congress which are representative of differences of opinion in the country. President McKinley cannot point out a single item in a programme of financial change to which the Republican party is committed; the Republican leaders in house and senate cannot embody a single change in existing laws which would be of real benefit and which would receive the united party support. Senator Wolcott, the acknowledged champion of international bimetallism and the outspoken foe of the single gold standard, is a better Republican than Senator Hoar, the

advocate of the Cleveland system of finance. Senator Lodge, the hopeless bimetalist from Massachusetts, Senator Chandler of New Hampshire, and Senator Smith of New Jersey, who has announced his intention of voting for the Teller resolution, are all good Republicans, and are consistent believers in the St. Louis platform, as is President McKinley himself, and under existing circumstances they all have as good a right as he to interpret the platform according to their particular ideas.  
 The time has not yet come when the Republican party is committed to the gold standard and the retirement of the greenbacks in favor of national bank notes, and the time has not yet come when the friends of silver have all been driven from the ranks of the party. When that time does come, if ever, Republicanism will not be what it is now, and the party will not have a majority of the votes of the people of the United States.

THE CATTLEGROWERS' CONVENTION.

The unfortunate prominence given by the press reports to the barbed wire and the "bugle call" as features of the convention offered by the city of Denver to its guests may have given rise to a misunderstanding of the real value and benefit of that convention. To effect this there is no better way than to call attention to the practical nature of the papers which were read on the principal day of the convention, Wednesday. It was stated in one of the opening speeches on Tuesday that an important object of the convention was to confer a regard to the changed conditions which had made of the cattle industry in the west a business practically new in its most important details. We believe that this object has been kept in view and that a very considerable amount of benefit will be derived not only by those in attendance at Denver but also by all those who are interested in stock raising in the western states.  
 To show how the thoroughly practical and modern view of the subject was discussed it is only necessary to glance at the subjects of the papers which were read on Wednesday. Mr. James Neff of Kansas City, a recognized authority on that subject, presented a paper on "Statistics as to Values of Live Stock and Prospective Conditions." W. A. Rehders, governor of Wyoming, advocated the cession of the arid lands to the states. To state engineer of Wyoming, Mr. Elwood Hunt, discussed the best method to avoid clashing between the owners of sheep and of cattle, and favored a system of leasing which would give every stockowner a legal right to the ground occupied by him. R. M. Allen, general manager of the Standard Cattle company of Ames, Neb., discussed upon the best method of feeding, and advocated diversified feeding as opposed to the single standard of diet. The prevention of contagious diseases was discussed by Dr. Grosswell, Colorado's state veterinarian. Dr. A. T. Peters of the State University of Nebraska, read a paper on modern methods of controlling contagious diseases, and two other papers related particularly to Texas fever. President Bush, of the Texas association, advocated the use of the Gulf ports as an important method of enhancing the live stock interests. Richard Gibson of Canada read a paper on the management of sheep. Each of these papers was replete with interest and of the highest practical value, and we can conceive of no pamphlet that would be of greater benefit to western stockowners than one containing in full the papers read at this convention.

MORE FOREIGN TRADE FIGURES.

The figures of the foreign trade of the United States in the calendar year 1897 show that the imports were \$1,000,000,000 greater than in 1896, but fell below those of 1895, and of each of the four years ending with 1902. The exports, however, were \$24,000,000 greater than those of 1896, which were the largest up to that time in the history of the United States, and they swelled the total volume of our foreign trade to \$3,410,000,000—the highest figure it has ever reached. The following table, compiled by the New York Journal of Commerce, compares the imports and exports of merchandise and the total volume of the foreign commerce of the United States, excluding coin and bullion shipments, for the period of eleven years:

Year	Exports	Imports	Total Trade
1887	\$1,000,000,000	\$1,410,000,000	\$2,410,000,000
1888	1,000,000,000	1,410,000,000	2,410,000,000
1889	1,000,000,000	1,410,000,000	2,410,000,000
1890	1,000,000,000	1,410,000,000	2,410,000,000
1891	1,000,000,000	1,410,000,000	2,410,000,000
1892	1,000,000,000	1,410,000,000	2,410,000,000
1893	1,000,000,000	1,410,000,000	2,410,000,000
1894	1,000,000,000	1,410,000,000	2,410,000,000
1895	1,000,000,000	1,410,000,000	2,410,000,000
1896	1,000,000,000	1,410,000,000	2,410,000,000
1897	1,000,000,000	1,410,000,000	2,410,000,000

The excess of gold coin and bullion exports for the year reached the insignificant amount of \$5,000,000, which was practically offset, so far as the stock of gold in the country is concerned by the excess of \$4,338 in the imports of gold in ore.

INCREASED SUGAR CONSUMPTION.

The remarkable increase in the consumption of sugar in the United States during the past 12 months points to the fact which the beet sugar enterprise in this country has to face.  
 The sugar consumed during 1907 was 2,066,200 tons against 1,930,000 tons in 1906, an increase of 136,200 tons or 7.04 per cent. There were last year only 11,311 tons of beet sugar produced in the United States, 285,000 tons of cane sugar, 5000 tons of maple sugar and 300 tons of sorghum sugar, making a total of 1,296,300 tons of various kinds of sugar produced in the country, and leaving 1,769,900 tons to be imported, most of which comes from Europe.

IT WON'T SUE.

The Omaha World-Herald, Mr. Bryan's personal organ, faithfully follows the cue indicated by that statesman to the effect that there are still no signs of prosperity in the country. This is one trouble which Mr. Hearst of the New York Journal, which has led Bryan to the skies in 1906, and some other "traitors" find with the ex-candidate; that he cannot see the prosperity about which everybody else is talking. It is surprising how men will boomer about such a little thing as prosperity coming to a few score million people. It is a fact that the Nebraska export is in making prosperity its great feature, and Nebraska, too, is Mr. Bryan's.

COMMERCIAL SUMMARIES.

35th WEEK OF THE YEAR.

More Increase in Business and Less Improvement in Prices than was Expected—No Disposition Among Manufacturers to Refuse Orders and Competition Prevents a Rise in Price—Competition Continues to be Enormous.

New York, Jan. 28.—H. G. Dunn and company's Weekly Review of Trade will say tomorrow: That the month of the new year has brought rather more increase in business, but less improvement in prices than was expected. With prices in many commodities showing a slight advance in 1909, and probably the last but not the least, in many months, with the fact that prices are very low, and that the demand for many commodities is still large, it is not surprising that the improvement in prices is not more rapid under the new rule than under the old, where claims could be held upon any work of any kind being done upon them. On the other hand, the new rule will discourage deep mining, which is often times necessary in order to determine the presence of mineral at a considerable depth. A company which owns a group of half a dozen claims can afford to sink a shaft to a depth of a hundred or more feet because the gains which would come in the event of success are proportionately large. But where a hundred dollars' worth of work must be done annually upon each claim the often meager resources of a prospecting company do not suffice for deep mining. On the whole the new regulation is a fairer and better one than the old.

The story of the killing of the Cuban general, Aranguren, has all the marks of another instance of Spanish treachery and barbarism. According to the story as reported from Spanish sources, the young patriot was assassinated while on a visit to his secretariat, and shot at first through the leg and afterwards through the head. Every one of the manager details is redolent of treachery and savage murder and there seems little doubt that the cowardice and perfidy which characterized the murder of General Macao have been revealed in their most disgraceful details. That General Aranguren is the insurgent leader who gave the order for the execution of Lieutenant Colonel Ruiz, makes it all the more probable that he felt a victim to Spanish treachery. General Aranguren, it will be remembered, was on a mission to General Gomez, commander in chief of the Cuban army, he was executed as a spy, although General Aranguren, who gave the order for his death, was his personal friend.

FAVORABLE TRADE CONDITIONS CONTINUE TO OUTWEIGH THOSE OF A POSITIVE RECESSION.

New York, Jan. 28.—Bradstreet's tomorrow will say: That the month of the new year will continue to show a record of trade of an opposite character. Stormy weather throughout a large section of the country this week has checked the movement of merchandise, and consumption on the part of the general public has been retarded. The principal increase in the demand for seasonal goods is reported as already resulting. The last week of the month closed with increased activity in the export trade, and the advance in the principal commodities has been maintained. The market for foreign goods is reported as comparatively quiet, but the demand for seasonal goods is reported as already resulting. The last week of the month closed with increased activity in the export trade, and the advance in the principal commodities has been maintained. The market for foreign goods is reported as comparatively quiet, but the demand for seasonal goods is reported as already resulting.

PIG IRON PRODUCTION.

Fig. 1 is feeling the effect of present overproduction and a further decline in prices is expected in the near future. At the west, however, consumption of pig and finished products of iron and steel is reported increasing. Large sales of pig iron and steel are reported at Chicago and St. Louis, with mills refusing to take orders for delivery earlier than late summer. Boots and shoes hold the late advance but manufacturers of heavy weights will not take orders for fall delivery at present prices.

Wool is strong on large sales and firm prices abroad. Prices of most staple products are higher on the week, notably those of wool, which is 10 to 15 per cent. higher than the dollar mark again at many of the markets. The active demand for the kind of stock is reported very strong. Stocks of wool are reported very strong. Stocks of wool are reported very strong.

BRADSTREET'S FINANCIAL REVIEW.

New York, Jan. 28.—Bradstreet's Financial Review tomorrow will say: Although the market was temporarily disturbed at the beginning of the week by exaggerated reports as to the purpose of the government in the matter of the sale of the Hawaiian Islands, the market has since recovered its normal position. The market for foreign goods is reported as comparatively quiet, but the demand for seasonal goods is reported as already resulting. The last week of the month closed with increased activity in the export trade, and the advance in the principal commodities has been maintained. The market for foreign goods is reported as comparatively quiet, but the demand for seasonal goods is reported as already resulting.

THE ST. LOUIS GLOBE DEMOCRAT SAYS.

The St. Louis Globe Democrat says that the roof of St. Bryan's new seminary is already growing thin in spots where the thought waves have beaten incessantly. The roof of St. Bryan's new seminary is already growing thin in spots where the thought waves have beaten incessantly. The roof of St. Bryan's new seminary is already growing thin in spots where the thought waves have beaten incessantly.

THE EASTERN MARKET.

New York Money Market.

New York, Jan. 28.—Money on call was quiet at 1 1/2 per cent. last loan, 1 1/2 per cent. Prime mercantile paper, 3 1/2 per cent. Sterling exchange, steady, with actual business in bankers' bills at 4 1/2 per cent. for 60 days, and 4 1/2 per cent. for 90 days. Gold and silver coins, 1 1/2 per cent. for 60 days, and 1 1/2 per cent. for 90 days. Silver certificates, 1 1/2 per cent. for 60 days, and 1 1/2 per cent. for 90 days.

NEW YORK STOCK MARKET.

New York, Jan. 28.—At the opening the stock market today looked as though orders accumulated by commission houses to sell and take profits. First sales were general at a fraction below last night's price. The market steadied immediately and recovered gradually above last night's level, net gains being however, very unequal. Quotations from London this morning showed a general advance in the market for American securities, and attributed to the appreciation of the dollar by the British mind yesterday by the vote on the Teller resolution. Denver and Rio Grande preferred showed a notable gain. The market for foreign securities was generally quiet, with a few exceptions. The market for foreign securities was generally quiet, with a few exceptions. The market for foreign securities was generally quiet, with a few exceptions.

CHICAGO CATTLE MARKET.

Chicago, Jan. 28.—Cattle—Bed: Steers were available at \$3.60 to \$3.70 as an extreme range for the poorest to the best. Hogs—Common to prime droves of hogs sold at \$3.60 to \$3.70, largely at \$3.60 to \$3.70. Pigs sold at \$3.60 to \$3.70, largely at \$3.60 to \$3.70. Sheep—Common to prime droves of sheep sold at \$3.60 to \$3.70, largely at \$3.60 to \$3.70. Lambs were available at \$3.60 to \$3.70, largely at \$3.60 to \$3.70.

PROSPECT OF PRICES FOR WHEAT.

Reports of the weather for wheat in every country in Europe are such that it is probable that the harvest will be a good one. The weather in Europe is such that it is probable that the harvest will be a good one. The weather in Europe is such that it is probable that the harvest will be a good one. The weather in Europe is such that it is probable that the harvest will be a good one.

A CHICKEN-PROOF FENCE.

I have tried various modes of fencing my yard with more or less success, but have not found anything so effective as a chicken-proof fence. I have tried various modes of fencing my yard with more or less success, but have not found anything so effective as a chicken-proof fence. I have tried various modes of fencing my yard with more or less success, but have not found anything so effective as a chicken-proof fence.

RIOT AT SKAGWAY.

Skagway, Alaska, Jan. 28, via Seattle.—A riot occurred here yesterday on the arrival of the steamer Alki from Puget Sound, between local longshoremen and the crew of the steamer. The captain of the Alki had brought a number of Indian longshoremen from Juray to discharge the vessel's cargo, and as soon as the steamer made fast to the dock and the Indian longshoremen began to work, a riot broke out. The riot was a serious one, and many of the Indian longshoremen were injured. The riot was a serious one, and many of the Indian longshoremen were injured.

HAVEN SPOTS IN SOIL.

The Orange Juice Farmer, writing in the Chicago Herald, says: "The soil in the Orange Juice Farmer's garden is a very good one, and it is a very good one. The soil in the Orange Juice Farmer's garden is a very good one, and it is a very good one. The soil in the Orange Juice Farmer's garden is a very good one, and it is a very good one."

CHICAGO GRAIN.

Chicago, Jan. 28.—Wheat showed some strength at the opening, but was soon weakened by Liverpool's advance. The market for foreign goods is reported as comparatively quiet, but the demand for seasonal goods is reported as already resulting. The last week of the month closed with increased activity in the export trade, and the advance in the principal commodities has been maintained.

SPORTING.

Lack of Whist Courage.

Under the above head Mr. L. Bouvier writes as follows in the Boston Transcript: "Many tricks are lost at whist by all classes of players who could be saved by the exercise of more courage and really failure to properly support a partner's hand is the secret of a large proportion of the losses of the character to be described. The reason for this is that which tells one to lead the ace of trumps regardless of number 7, in answer to a call from partner, should be borne in mind as applicable in a great many other analogous situations. In plain suits, players are quick to learn the importance of throwing to partners' support strength as they may hold in clearly established suits. The ace is a bear of four cases, but with a king or queen in suit no hesitation is shown in leading highest card, and if the lead is held, following with the card next in value. It is when there is a 'seco' suit that the partner's suit that players show the lack of courage. Even when perfect victory is assured, the suit which they are a bear of four cases, but with a king or queen in suit no hesitation is shown in leading highest card, and if the lead is held, following with the card next in value. It is when there is a 'seco' suit that the partner's suit that players show the lack of courage. ### State Board of Arbitration Will Settle the Differences

**Difficulties Will Settle**  
The difficulties existing between the mine operators and the coal miners at Louisville, which has lasted for 10 days, has been settled. The state board of arbitration has decided that the end of the coal strike is near. The operators are determined to interfere with the manufacturing industry. The board has brought to the attention of the strikers the fact that they have refused to accept the previous determination of the board of arbitration. The board has decided that the price to be paid for coal is to be determined by the board of arbitration. The board has decided that the price to be paid for coal is to be determined by the board of arbitration.

Port and Creek with over \$2,000,000 in 1927.

AND OVER \$3,000,000 IN 1928.

Currently reported that the Annual Report is to be a Dandy-Secretary Peck Declines to Discuss the Matter—The Policy of the Management—Everything seems Very Flattering of the Company.

The general talk among the mining fraternity is that the next annual report of the Portland Gold Mining Company is going to be a dandy.

A representative of the Gazette called at the Portland office yesterday to learn something about the matter but found the secretary unrelenting and unwilling to say anything about the matter.

Mr. Peck made complaint of certain matters having been set out before the proper time and added that so far as he was concerned he would give nothing away this year.

The general talk that has been going on for the past few weeks, has been of the most flattering nature to the Portland Gold Mining Company and everyone has been saying that a really big year is ahead.

It is claimed by those who say that they are in a position to know that the cash receipts for this year will be greater than any previous time in the history of the company. The sum is placed at \$3,000,000 or better which is equal to 10 cents per share on the 3,000,000 shares of the stock which are less than last year.

Report has it that the company's properties are showing up in grand style and this opinion is apparently shared in by those who are nearest to the management as well as those who are further away.

It is said that the next annual meeting will be some change in the directors and some people and the Denver papers are hinting at a probable fight for control.

The representative of the Denver Republican was bold enough to make a guess at the next directors and asked how a board composed of Messrs. James Burns, John H. H. W. S. Stratton, A. Hayes and Irving H. H. W. S. Stratton.

The Gazette discourages the idea that there will be any fight for control and ventures the opinion that such a directorate as is named above would suit the story holders very well.

It is not known, however, whether such a directorate will be chosen and it will probably not be known until after the annual meeting.

The Ladies of the Dream Lodge Mining Company Have Opened an Ore Chute in the Monte Christo Claim.

An ore chute has been opened up in the Monte Christo claim belonging to the Magnet Rock Gold Mining Company.

A good many of the stories have been prospecting for ore on this well located property, but it was left for the ladies composing the Dream Lodge Mining Company to find it.

profits from mining in the district during the month. The most prominent instances are the Independence and Doctor, which may be credited with \$25,000 between them, bringing the grand total up to and over \$250,000.

There are other companies which might possibly be on the dividend list but which are not on account of the ultra conservatism of their respective managements.

The Gold Star, Last Dollar and several other properties are said to be doing well enough to warrant dividends that have yet to be heard from in this connection.

During the month a brand new dividend was declared by the Portland Gold Mining Company. The total amount to be distributed is \$10,000 and there is every promise for such dividends to be continued for years to come.

AVOY-ER VOY-ENDER.

The Pay Rock Mine Away North of Cripple Creek Town Showing the In Very Good Style.

If anyone has any doubts of the discovery of ore in the north end of Cripple Creek district he should be himself to the Pay Rock claim and take a good look around.

In all the excitement concerning the Fluorine and other finds that have been made in the Copper Mountain neighborhood, Pay Rock has scarcely been heard from but it stands today as one of the best prospects in the district.

The claim is located on the foot of the Fluorine and other finds that have been made in the Copper Mountain neighborhood, Pay Rock has scarcely been heard from but it stands today as one of the best prospects in the district.

Proc. 1000 in Grade Creek

W. V. L. for Rest.

30 IMPROVEMENT, A. L. K. N.

Twelve Cars of Ore Left, the Mine Last Week—Value Roughly Estimated at \$1,000—Moon Anchor and Anchoria Leland Both Doing Well—Work, Favorite, Station and Many Others Also Contributing—The Last Week as Good as the First—Month's Show up will be a Good One.

Although all the ore haulers and railroads have been busy during the month the company managements do not seem inclined to give them a chance for a rest and are still making an outcry for more wagons and more cars.

The production during the last week of the month has been as heavy as the first and the whole has made a most creditable showing.

Following are some of the shipments made during the past week:

**Elkton.** The heavy shipments made in a week for some time past was the record of the Elkton Consolidated during the past week. The shipments amounted to six cars of second grade ore and seven of third. These were all big cars of ore and a rough estimate at the value of them places them at about \$1,000.

The second grade ore probably had an average value of \$20 per ton, and the first grade fully \$30 per ton. The low grade had a value of from \$200 to \$300 in a conservative way.

**Moon Anchor.** From the Moon Anchor 10 tons of ore went out last week. It was all 2000 in one smelter grade. Most favorable reports are being circulated concerning the company.

**Anchoria Leland.** While the Anchoria Leland management is busy considering about its proposed reduction plant it is not forgetting to take out some ore. The production last week amounted to 150 tons, all of which was smelter grade.

**Station.** About 200 tons of ore are now out from the Johnson lease on the Station company's ground. No returns were received last week, but several are expected in a few days.

**Work.** Only one shipment was heard from last week from the Work company, and that was on company account. It was a 50-ton lot of an average value of \$25.00 per ton.

**The Lower Gold Coin Lease.** Mr. J. Arthur Corbell has returned from Victor, where he went to look after his lease on the lower end of the Gold Coin and other parts of the Mt. Rosa territory. He declared that the property was in the first 50 feet of sinking and with that end in view bids are now open. It is thought that work will start up by February 1.

**Chicago-Cripple Creek.** Newland & Kline have sorted out near 20 tons of mill dirt from their dump taken from the Lella vein through the Chicago-Cripple Creek tunnel, and have started shipments. On Thursday they shipped 20 tons of smelter grade, and have the chute opened up better than for several weeks.

**Modoc.** Last week the output from the Modoc has been three cars of a high-grade smelter ore. The company is sinking a winze from the creek side, and in breaking six inches of ore that runs from \$20 to \$30 a ton.

**Favorite.** Three leases on the Favorite are producing in a small way, the output averaging 100 tons of ore, the grade being about two ounces in value.

During the week returns were received on 12 tons of company ore. It was from the newly-opened chute and went at the rate of 30 per ton.

**Australia.** Jacobs & Bush shipped Thursday from their lease on the Australia on Beacon Hill 10 tons of smelter and 20 tons of mill dirt to the smelter. They are working the property through the Columbia tunnel.

Pred Bunt and other loading on that part of the Australia which is being worked through the Columbia tunnel, will make another 10-ton shipment of smelter grade today.

**Vindicator.** The Crawford lease on the Wallace, adjoining the Hull "B" placer, last week sent to the smelter three carloads of ore.

**Zenobia.** Simmons and associates have returns on 18 tons from their lease on the Zenobia that gave them \$2 a ton.

**Samuels & Co.** have a second shipment ready from their new vein on the Elkton on Carbonate Hill, and estimate the ore at four ounces. This cross-cut from the bottom of the 150-foot shaft has reached the vein and found 15 inches of pay ore.

**Gold King.** The present output of the El Paso, on Poverty gulch, owned by the Gold King company, is 30 tons of ore per day, which is sent to the mill at Colorado City. Besides this mill frequent a car of high-grade quartz goes out to the smelters.

**Cripple Creek Consolidated.** From the Garsin lease on the May Queen a carload of ore was shipped yesterday that it is thought will go two ounces to the ton. It has been taken out

In sinking the shaft, which is now 11 feet deep, the pay streak in the bottom is 15 inches in width.

**Gold Sovereign.** The old vein known as the Gold Sovereign, known as the Lowell, is now under the management of D. D. Fielding, a miner of large experience.

He is shaping up the workings in an efficient and safe manner, and on the 15th inst. has made two shipments of about 20 tons each.

Stopping is in progress at the 90-foot level, where the vein is known to be 10 feet long with 15 inches of the drift in a good pay. Shipments average 50, with an eight-foot strike in the two-foot vein will smelt 14 ounces or better to the ton.

**Special to the Gazette.** Cripple Creek, Jan. 25.—Preparation is being made to open up the big ore chute on the Ingram at great depth.

Excavations have been completed for the installation of a big plant of machinery to sink a winze from the tunnel level.

The machinery is now on the ground and will be put in place in a few days. The winze will be sunk to a depth of about 20 feet. The vein matter runs about an ounce and a half of gold to the ton.

The ore body is one of the largest ever opened up in the camp, having been proved up to a depth of about 20 feet. It is thought that this immense ore body will be a great asset to the company in value as depth is gained.

It is estimated that the thickness of this company's holding is 200 feet, and is present keeping up its regular output of 20 to 25 tons a day.

Sinking is steadily in progress in the Main and Ingram new main shaft. The depth of the shaft is now 100 feet. The depth of cross-cut will be 10 feet. The 50-foot level is reached. All ore between the surface and that level can be taken out through the old workings.

**George Bush and company**, who are operating the S. H. V. on Beacon Hill, under a lease, have a new plant of machinery in working order and will begin to sink a shaft to a depth of 20 feet. The shaft is 25 feet in depth and the lower 15 feet is filled with water. It is the intention of the lessees to sink it to the bottom of the shaft, where the vein is known to be 10 feet thick. The shaft will be sunk to a depth of 20 feet. The shaft will be sunk to a depth of 20 feet. The shaft will be sunk to a depth of 20 feet.

**Elkton.** Sinking is steadily in progress in the Main and Ingram new main shaft. The depth of the shaft is now 100 feet. The depth of cross-cut will be 10 feet. The 50-foot level is reached. All ore between the surface and that level can be taken out through the old workings.

The shaft will be sunk to a depth of 20 feet. The shaft will be sunk to a depth of 20 feet. The shaft will be sunk to a depth of 20 feet.

machinery consisting of a 60-horse power boiler, an 800-horse power engine and a new shaft and ore house 25x11 feet in dimensions.

He is working three shifts of men and will put the shaft down to its full depth in 30 days. There is pay ore now in the shaft but he proposes to go to a good shaft and sink it to a depth of 100 feet. The company undoubtedly expects to take up the bond at the expiration of the lease.

**Renewed Activity.** Since the Smith-Moffat syndicate has purchased the Galena and put a force of men at work and has announced its intention of sinking the old plant of machinery from the Victor mine on the claim, prospecting in that locality has received a boost.

The Galena is on the west slope of Red Mountain, some 100 feet northwest of the city on Spring Creek. It is a small claim, on 100 feet of mountain, about 50 feet from the Galena is the Mountain Spring, consisting of a porphyry King, owned by the Minneapolis and St. Paul Mining Company.

This company is preparing to put in a vast amount of development work on its property. A big shaft house is to be erected and a plant of machinery is already ordered and will be in operation in 30 days.

There is already a prospect known to be in depth in which there is exposed a vein which has been almost pay. At the surface the vein measured 12 inches in width. At 70 feet it is five feet across and assays 200 to 300 ounces to the ton.

The company will sink a large shaft on the west side of the property, and men are at work on it. The company is composed of Minneapolis people with plenty of money at their back.

**Disputed Claims.** Copper Mountain is now the scene of a claim war which is attracting much attention. This time the trouble is over the claims of the Copper Mountain Gold Mining Company called the Annie and Lost Mines. Under a former administration of the company, Mountain company, the Annie and Lost Mines were sold to the Bunker and Co. of Colorado.

The Bunker and Co. sold the Annie and Lost Mines to the Bunker and Co. of Colorado. The Bunker and Co. sold the Annie and Lost Mines to the Bunker and Co. of Colorado. The Bunker and Co. sold the Annie and Lost Mines to the Bunker and Co. of Colorado.

**Lucky Guss Strike.** The Boyle lease on the Lucky Guss has a remarkably rich strike in an upraise from the 150-foot level. A six-inch vein of fluorine stained quartz was cut which shows free gold in prize quantities.

Assays on the entire lead range from \$150 to \$200 per ton. A trial shipment of this rich ore is now being sacked. Shipments from the other workings are being made with regularity. Fifty tons of 300 ore and 15 tons of 150 ore will be marketed in a few days.

The Franks and Clements lease on the Six Points on Bull Hill is once again bringing that property into prominence. The lessees are working from the Los Angeles shaft from which a cross cut has been run to the Six Points ground, where an extension of the Los Angeles lead has been cut. A shipment of 10 tons sent out several days ago returned \$40 per ton. Another shipment will be marketed this week.

**Garfield-Grouse Work.** Liggett, Owens & Co., whose lease on the Garfield-Grouse made such a remarkable record up to the time when work was stopped on account of litigation, are preparing to resume work in the next few days. Fully 100 men will be employed on the property.

Lessee Keith, on the Wallace ledge, has selected a new steam hoisting plant on the property, preparing to sink 100 feet from that point. The shaft will be run to open the extension of the Victor vein.

The management of the Lane on the west slope of Bull Hill is putting the shaft down to a depth of 80 feet. The shaft is now 36 feet deep. The work of sinking is retarding the production of ore from the large and continuous drift on the hill.

Simmons & Co. on the Zenobia, will have a shipment of 35 tons of three-ounce ore and a small consignment of high grade ore ready for market by the first of the new month. Returns have been received from an 18-ton shipment sent out last week. The ore went for \$15 per ton. It was loaded on wagons without sorting. A good cross-cut at the 30-foot point shows the vein to be 10 feet wide and one small streak assays very high.
